Summary

I build web products, test them myself, and hire the engineers who build the rest. Senior Full Stack Developer with 5+ years across Angular, Vue.js, React, Next.js, NestJS, Python-Django, PHP, GraphQL, PostgreSQL and TypeScript. I write each feature, write its test cases with TDD, and run the end-to-end automation in Cypress, Playwright and Selenium, so quality is not handed off to someone else. I gather requirements straight from stakeholders and work with AI in the loop using Claude and Cursor. I am also a technical recruiter who has placed 30+ engineers, so I know what a strong engineer looks like from both sides of the hiring table.

Relevant Skills

- **Full Stack Development:** REST API design, micro-frontend architecture, scalable web applications, performance optimization
- **Frontend:** Angular, React, Vue.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- **Backend & Databases:** Python-Django, Django REST Framework, Node.js, NestJS, PHP, GraphQL, PostgreSQL, MySQL, pgAdmin, query optimization
- **Testing & QA:** TDD, manual testing, end-to-end automation, unit testing, Cypress, Playwright, Selenium, Postman, bug triage, debugging
- **AI-Assisted Work:** Claude, Cursor, AI code review, AI-generated test cases, AI in recruiting
- **DevOps & Practices:** Git, CI/CD pipelines, Docker, Agile, JIRA, Azure DevOps, Slack, requirements gathering, system design, clean code
- **Recruiting:** technical screening, sourcing, stakeholder management, ATS tracking (Manatal), team training

Professional Experience

Software Engineer – Container Intelligence

Apr 2026 – Present

[Kpler](#) (augmented via [ZeuZ](#)), Contract, Remote

- Build micro frontends with Vue.js, React and Next.js, backed by PHP and GraphQL services, on the Container Intelligence product.
- Build every feature with TDD, writing the test cases myself and testing each feature before handoff.
- Hand each feature to the product manager, CSM, marketing and engineering manager for cross-checking, tracked in JIRA and Slack.
- Work with AI in the loop, using Claude and Cursor for writing code, reviewing it and generating test cases.
- Built Selenium and Playwright test actions for [qa.zeuz.ai](#), the ZeuZ in-house QA product, using Next.js and Python during the first two months on the internal team.

Software Engineer & Technical Recruiter

Aug 2025 – Present

[Talvette](#), Remote

- Gathered product requirements and delivered core features on the [Talvette](#) platform with TDD: Article, Job Board, Contact System, Preview modules and error handling.
- Wrote every test case myself and built end-to-end QA automation in Cypress, running daily health checks so each feature keeps working.
- Cut my own recruiting workload by 80% with AI assistants, then trained my teammates in a session I ran called “AI in Recruitment: Smarter Hiring with Practical AI Tools”.
- Placed 30+ engineers including a Staff Software Engineer, Senior Full Stack Engineers, a Go-to-Market Engineer, a Senior iOS Developer and a UI/UX Engineer.

- Sourced 10,000+ candidates, ran 200+ phone screens and 100+ ORC calls with hiring managers to pin down what each role needed.
- Designed structured technical screening frameworks to make candidate evaluation faster and more consistent.

Software Developer (Full Stack)

June 2023 – April 2026

BaryTech Technologies, Remote

- Built and scaled the [EINO](#) application with Angular on the frontend and Python-Django on the backend.
- Cut API response times by 30% with targeted query optimization and caching across a 15,000+ line codebase.
- Refactored 15,000+ lines and closed 150+ critical bugs, improving code maintainability by 40%.
- Raised critical tickets the QA team had missed, then trained that team on JIRA and later Azure DevOps.
- Upgraded the codebase from Angular 13 to Angular 18, handling the rebase and refactor without breaking the REST API layer.
- Shipped video features including screen recording and trimming, lifting user productivity by 30%.
- Integrated real-time chat with a cross-functional team, raising user engagement by 40%.
- Built core modules for team management, calendar, maintenance, translation and media, with secure API integrations on PostgreSQL and pgAdmin.

Project Manager & Product Manager (eqUIP Program – Media & IT)

April 2024 – March 2025

Commonwealth Sport (CGA), Bangladesh Olympic Association, Onsite

- Ran the full requirements-to-testing loop: collected requirements from stakeholders, briefed developers, tested the delivered work and raised the issues, all tracked in Google Sheets.
- Led development of the [CGA-Bangladesh website](#), raising digital visibility by 70%.
- Planned a centralized national athlete database covering 10,000+ athlete profiles.
- Coordinated esports initiatives with the Sports Minister, the Global Esports Federation and the Bangladesh Olympic Association.
- Streamlined data workflows, cutting processing time by 20%.

Junior Software Engineer (QA Focus)

Jan 2022 – May 2023

bongoDev, Remote

- Built the [bongoDev](#) application with React, Next.js, NestJS and TypeScript.
- Tested my own work and other developers' work, logging every bug in Google Sheets.
- Automated QA pipelines, cutting manual testing effort by 40%.
- Refactored legacy systems, closing 60+ bugs and improving maintainability by 20%.
- Wrote internal documentation and project wikis, cutting new developer onboarding time by 50%.
- Worked in Agile cycles including sprint planning, stand-ups and code reviews.

Projects

- [EINO](#): Knowledge management platform serving 1500+ users, with optimized APIs and efficient data retrieval.
- [Recruitr.AI](#): an AI hiring assistant that covers every stage of hiring, from writing bias-free job descriptions to shortlisting candidates, running AI interviews and scoring fit.
- [Website Visitor Counter](#): open-source npm package for real-time visitor tracking with no backend needed.

Education

Bachelor of Science in Computer Science & Engineering

2018 – 2023

Jahangirnagar University, Bangladesh

Certifications

Fundamental Information Technology Engineer Examination (FE) by [ITEE](#). Full Passer, ranked 13th in Bangladesh
April 2022
